The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23,2-6,9-15 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over German pat. '566 to Miller in view of Waters et al. and Erckhoff. Miller shows the claimed scaffold with the exception of the holding means and the plurality of guide stops. Waters shows holding means 12 attached to recessed end portion of a platform for anchoring the end portion of the platform to horizontal carriers that are parallel to and adjacent to the end portion of the platform. Erckhoff at 71 shows a plurality of hook-like guide stops on side portions of a platform for engaging over a supporting frame side rails. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the end portion of the platform of Miller to comprise holding means, as taught by Waters, for anchoring the end portion of the platform to his parallel first horizontal carriers 47 and to comprise plural hook-like stops, in lieu of his single hook member at 11, to enable intermittent side support of the side of his platform to his second horizontal carriers 41. The claimed method would have been obvious to one of ordinary skill in the art in view of the modified scaffold to Miller.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miller, Waters, and Erckhoff, as applied to claim 4 above, and further in view of Schworer. Schworer shows a rose connector for attaching horizontal carriers. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the vertical members of Miller to comprise rose connectors for attaching horizontal carriers to his vertical members.

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's election of group I in the reply filed on 09.08.04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's arguments filed 4.15.04 have been fully considered but they are not persuasive. With respect to Miller and Waters, applicant stated that there is no motivation for Miller to comprise holding means as taught by Waters. It is noted that Miller, Waters and the claimed invention are of the same field of endeavor, thus it is proper for one of ordinary skill in the art to appreciate the teachings of Waters for his disclosed purpose to resolve the difference at hand between the prior

art of Miller and that claimed invention. Applicant stated that to modify Miller as taught by Waters would be redundant. The examiner disagrees, as it would provide enhanced support just as applicant's claimed invention, as I assume that applicant does not believe his claimed device is redundant.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
